

George LOH

Mr George Loh is the Assistant Director (Maritime Systems) in the Defence Research Technology Office (DRTech), Ministry of Defence Singapore. In DRTech, which was setup in end Oct 2006, George manages the entire R&T portfolio for Maritime Systems including underwater systems and unmanned maritime systems for the Ministry of Defence. He also formulates long-term strategy for defence R&T from technology development to advanced demonstrator to guide R&T investment as well as orchestrates and implements integrated ops-tech concepts in maritime systems to transform SAF's warfighting capabilities.

Prior to the current appointment, George was the Deputy Head, Defence Technology Office (United States) in the Singapore Embassy in Washington DC since Mar 2003. The DTO(US) was setup in 1999 to explore and facilitate defence technology cooperation with partners in the US. The office looks for niche technologies and provides the link between US partners and Singapore's defence R&D establishments including government, research institutions, industries and universities.
